

SYSTEM FLOWS — PHASE 1

System Flows — Phase 1

The Archive MVP

v2.0 · Richard Uzor — May 2026 · Devstrike Digital Limited

01 — PHASE 1 FLOW SCOPE

Phase 1 flows cover only the Archive layer and core Events (concluded + basic upcoming). Social layer flows do not exist in Phase 1. This document is the complete reference for Phase 1 frontend routing, API design, and QA test cases.

02 — GUEST VS ACCOUNT DECISION TREE

1. Visitor Arrives

- System checks for auth cookie.
- [Authenticated] → account user flow.
- [No auth] → guest user flow. Cookie checked for prior post count.

2. Guest Capabilities

- Read all messages, pastor profiles, church profiles, events.
- React to messages once per message.
- Post up to 3 messages (cookie + IP enforcement).

- Ask one question per message (inline KYC: name + email).
- Share any message or event.

3. Account Capabilities

- All guest capabilities, plus:
- Unlimited message posting, create pastor/church/event profiles, edit mutable fields.
- Save messages and events, suggest features.

03 — MESSAGE POSTING (PRIMARY FLOW)

1. Entry Points

- Gold FAB button on feed.
- Add Message button on pastor profile.
- Add Message button on church profile.

2. Guest KYC Gate

- [Guest] Check cookie post count.
- Count ≥ 3 : show 'Limit reached — create a free account' modal.
- Count < 3 : show inline name + email fields before form.

3. Message Form

- Message text (multiline, 2000 char max, live counter).
- Pastor name: typeahead. If not found → option to create new pastor (account only).
- Church: typeahead. Branch field appears if church has multiple branches.
- Date preached: date picker, defaults to today.
- Category: multi-select chips, max 3.
- Bible reference: optional free-text.
- Event: optional typeahead.

4. Submission

- Client-side Zod validation → POST /api/v1/messages.
- Success → message detail page opens + share prompt displayed.

- Share sheet: WhatsApp (default), Instagram, Copy Image, Copy Link.

04 — MESSAGE DETAIL FLOW

1. Load

- Full message text, pastor, church, event, date, category, Bible ref.
- Reaction counts. Q&A thread below.

2. Interactions

- [React] → record, animate count.
- [Share] → native share sheet + quote card image.
- [Save] → account only → personal library.
- [Question] → one per user, KYC or account prefill.
- [Report] → reason picker → flag system.

05 — PASTOR & CHURCH PROFILE FLOWS

1. Browse

- Searchable paginated list. Filter by church, denomination, most messages.

2. View Profile

- Name, title, church, image, bio, contact, stats.
- Tabs: Messages | Events | About.

3. Edit Logic

- Mutable field: account user sees edit icon → inline edit → save.
- Immutable field: 'Contact support to edit this field' → email to support team.

4. Create Pastor / Church

- Account only. Form → save → linked to church if provided → creator set as original owner.

06 — EVENTS (PHASE 1 SCOPE)

1. Concluded Events

- Browse → filter by church, pastor, year.
- View event: messages, pastors, testimonies tabs.
- Submit testimony: KYC or account → text → moderation → published.

2. Upcoming Events (Basic)

- Account creates event: name, church, dates, location, theme, pastors, image.
- No payment in Phase 1 — all upcoming events are free listings.
- Listed chronologically on Events page.

07 — SEARCH FLOW

1. Entry

- Search icon in nav. Bar auto-focused. Trending topics as chips. Recent searches for account users.

2. Execution

- GET /api/v1/search?q=... after 300ms debounce.
- Tabs: Messages | Pastors | Churches. Default: Messages.

3. Results

- Tap result → detail page.
- Zero results: 'No results for X — try a different spelling or browse by category.'
