

SYSTEM FLOWS — PHASE 2

System Flows — Phase 2

Events + Social Seed

v2.0 · Richard Uzor — May 2026 · Devstrike Digital Limited

01 — PHASE 2 ADDITIONAL FLOWS

This document covers flows added or significantly modified in Phase 2. All Phase 1 flows remain active and unchanged. Phase 2 introduces: sponsored events, payment processing, calendar integration, verified profiles, PWA, public feed, and social interactions.

02 — EVENT AD SUBSCRIPTION FLOW

1. Create Sponsored Event

- Account user creates upcoming event (Phase 1 flow).
- After saving: 'Promote this event?' prompt with Tier A / B / C plan cards.
- User selects tier → POST /api/v1/payments/initiate {type: 'event_ad', tier, event_id}.
- Redirect to Paystack checkout. On success: Paystack webhook fires to /api/v1/payments/webhook.

- Webhook validates HMAC signature → activates Sponsored badge on event for subscription duration.

2. Sponsored Event Display

- Events with active ad subscription: gold border, 'Sponsored' label, surfaced first in upcoming events.
- Ad expiry: system auto-removes Sponsored badge at end of subscription period.
- Church rep notified 3 days before expiry with renewal prompt.

03 — CALENDAR INTEGRATION FLOW

1. Save Event to Calendar

- Account user taps 'Add to Calendar' on any upcoming event.
- [Not Google-authorized] → system initiates Google Calendar OAuth flow.
- [Authorized] → POST to Google Calendar API → event created with title, date, location, link.
- [Guest] → 'Create a free account to save events to your calendar' prompt.

04 — VERIFIED PROFILE FLOW

1. Application

- Account user visits pastor/church profile they created or manage.
- Taps 'Apply for Verification' → form: full legal name, supporting links, reason.
- Selects payment tier: ₦10,000/year (pastor) or ₦25,000/year (church) → Paystack.
- On payment success: application enters admin review queue.

2. Admin Review

- Admin verifies identity against supporting information.
- Approved: blue check badge activated on profile. Applicant emailed.
- Rejected: applicant emailed with reason. Payment refunded.

05 — DONATION FLOW

1. Initiate Donation

- 'Support WaMPaS' button in footer and profile page.
- Suggested amounts: ₦500 / ₦1,000 / ₦2,500 / ₦5,000 / Custom.
- POST /api/v1/donations/initiate → Paystack checkout.
- Success: receipt email sent, donor name added to supporters list (opt-in).

06 — PUBLIC FEED FLOW

1. Post to Feed

- Account only. Compose button in nav.
- Post types: Text reflection | Scripture (with reference) | Archive message share | Photo (single image).
- All posts attributed. No anonymous posting permitted.
- Post submitted → feed entry created → shown to followers and in main feed.

2. Feed Browsing

- Default feed: mix of following + recent + trending.
- 'Following' tab: only posts from followed pastors, churches, users.
- React: Amen / Fire / Praying (one per user per post).
- Comment: threaded. Flag button on every comment.

3. Archive-to-Feed Share

- User taps Share → Post to Feed from any message detail page.
- Feed post pre-populated: quote card image + pastor attribution + link to archive page.
- User can add personal reflection text before posting.

07 — PWA FLOW

1. Install Prompt

- After 3rd visit or after first message post: browser install prompt shown.
- Accept → app added to home screen with WaMPaS icon.
- Service worker caches: feed page, pastor profiles browsed, saved messages.
- Push notification permission requested on install.

2. Push Notifications

- Event reminder: 24 hours before saved upcoming event.
- 'Your pastor posted a new message' (if following a pastor).
- 'Your question was answered'.
- All notifications link directly to relevant content.
