

SYSTEM FLOWS — PHASE 3

System Flows — Phase 3

Full Social Platform

v2.0 · Richard Uzor — May 2026 · Devstrike Digital Limited

01 — PHASE 3 FLOW SCOPE

Phase 3 introduces the complete Social layer: fellowship rooms, prayer rooms (live and async), direct messaging, elder governance, and the denomination HQ dashboard. All flows below are new additions to the system. Phase 1 and 2 flows remain active.

02 — FELLOWSHIP ROOM LIFECYCLE

1. Create Room

- Account user taps 'Create Room' from Rooms section.
- Form: room name, type (Cell Group / Bible Study / Topic / Denomination-wide / Open Fellowship), linked church (optional), privacy (open/invite-only), description.
- Owner role assigned to creator. System creates room, indexes for search.

2. Join Room

- Open room: tap Join → account confirmed → member added.

- Invite-only room: user requests to join → owner/elder approves → member added.
- Room linked to church profile: visible on church's Rooms tab → members discover via church profile.

3. Room Governance

- Owner assigns up to 3 elders from existing members.
- Elder actions: warn member (visible to member + owner), mute member (24h / 7d / permanent), remove member.
- 3 warnings on same member → auto-escalation to owner review.
- Owner can appeal elder decisions or overrule them.
- Platform admin can supersede owner/elder for platform-level violations.

4. Room Posting

- Text posts, archive message links (rendered as embedded cards), scripture references, image (single).
- External links require elder approval before they display as links (shown as plain text until approved).
- Post reporting: any member can flag a post. 3 flags → elder notified. Elder approves or removes.

03 — PRAYER ROOM — ASYNC FLOW

1. Submit Prayer Request

- User taps 'Post Prayer Request' in any Prayer Room.
- Text (max 500 chars), anonymous toggle (hides display name, preserves account for moderation).
- Anonymous requests: enters admin review before publishing (default 2-hour window).
- Published request: visible to all room members.

2. Intercede

- Member taps 'Standing in Agreement' — count increments, member added to intercessor list.
- Member can post an intercession response: short prayer text under the request.
- Intercessor list visible to request poster (encouragement signal).

3. Mark Answered

- Request poster taps 'Mark as Answered'.
- Prompted to write testimony (optional but encouraged).
- Answered request: green badge, moved to Answered section of room.
- Testimony entered into platform's answered prayer archive (discoverable globally).

04 — PRAYER ROOM — LIVE SESSION FLOW

1. Create Session

- Verified pastor or room elder creates live session: title, duration (30/45/60/90 min), start time.
- Session posted to room. Members notified via push notification.
- Pastor-created sessions highlighted on pastor's profile and feed.

2. Run Session

- Session starts at scheduled time. Leader posts session theme.
- Structured turns: leader marks when it's open for member responses.
- Members post prayers, scriptures, responses in real-time (WebSocket).
- Leader can spotlight a member response (pinned for all to see).

3. End Session

- Leader taps End Session or time expires.
- Session transcript archived in room history.
- Leader can publish a session summary to the public feed.
- Participants notified with link to transcript.

05 — DIRECT MESSAGING FLOW

1. Initiate DM

- Account user visits another user's public profile.
- Taps 'Send Message' (only visible if recipient has DMs enabled in settings).

- Thread created. Message delivered in real-time via WebSocket.

2. DM Governance

- DMs are end-to-end private but reportable.
- Report DM: submits thread to admin review (admin can view reported thread).
- Same escalation path as public content violations.

06 — DENOMINATION HQ DASHBOARD FLOW

1. Onboarding

- Devstrike team signs licence agreement with denomination HQ.
- Admin provisions HQ role on denomination's master account.
- HQ account linked to all church profiles under that denomination.

2. Dashboard Capabilities

- View all messages attributed to any church in the denomination, filterable by branch, pastor, category, date.
- Flag a message for pastoral review — flagged message visible to church rep for response.
- Analytics: message volume by branch, trending topics across denomination, reaction counts.
- Export: CSV export of messages for any date range.

3. Branch Communication

- HQ can publish a denomination-wide announcement to all branches' church profiles.
- Announcement appears as a pinned notice on each branch's profile page.
- Churches can acknowledge the announcement — acknowledgement count visible to HQ.

07 — PREMIUM SUBSCRIPTION FLOW

1. Upgrade to Premium

- User taps 'Go Premium' from profile or feed.
- Plan selection: Monthly ₦2,500 / Annual ₦25,000.
- Paystack Subscriptions API handles recurring billing.
- On activation: ad-free flag set, curated booklets unlocked, premium badge shown.

2. Premium Features Active

- Ad-free browsing across feed, archive, events.
- Monthly curated message booklet (PDF, generated by editorial team).
- Premium badge on profile and in rooms.
- Early access to new features before general release.
